

Retention, Revision, and Mastery

These are key goals for any tutoring or mentoring program. Connecting students with qualified tutors and mentors can have a huge impact on student success, achievement and retention. AskOnline, the leading e-tutoring platform, can help you retain more students and ultimately impact your bottom line.

Whether you staff your tutoring program with peer tutors or professionals, focus on core competencies or span a wide range of subjects, having a successful tutoring program is vital to keeping student retention rates high. For struggling students, high achievers, and everyone in between, tutors are often an invaluable academic resource.

An effective tutoring or mentoring program ensures that tutors can establish and maintain a connection with individual students. Adding the power and flexibility of internet-based tutoring will increase the effectiveness, reach and efficiency of your current learning support program.

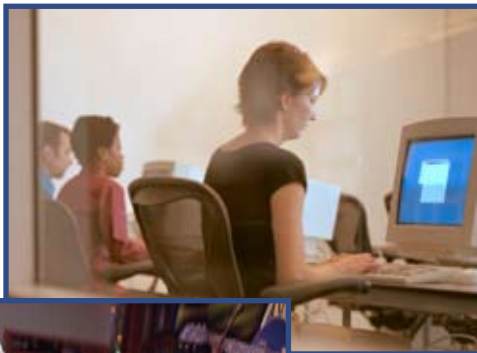

Online and Anytime

Conflicting schedules, commuting students, and specialized subject matter are just a few of the reasons why a physical learning center, staffed to cover a fixed schedule, cannot necessarily cover all student needs. Having a web-based tutoring connection creates a 24/7 resource which can be accessed and serviced from anywhere an Internet connection is available.

With an online presence, your tutoring center can reach underserved populations, as well as enhance the level and scope of services for the students you are already serving. An online tutoring center can be available to students wherever they are, on campus or off. Its doors can be open, 24 hours a day, so students can seek help at the exact moment they need it.

Easy to Implement, Easy to Use

The AskOnline Tutoring Platform provides the communication tools and administrative capabilities you need to bring your tutoring efforts online – all in a hosted solution so you don't have to purchase any additional hardware or software. AskOnline was developed by former tutors and tutoring service administrators who understand what tutors and students need to communicate and collaborate effectively. It's easy to get up and running, and it's easy for students and tutors to use. More than 50 leading educational institutions around the world have chosen AskOnline to power their online tutoring environments.

“ AskOnline is very intuitive, simple in design, and so easy to use. ”

- Tutorial Coordinator, University of Washington, TRIO

The following is a partial list of Institutions that have chosen AskOnline for their online tutoring needs:

- ▶ Berkeley College
- ▶ Cal State University - LA
- ▶ Eastern New Mexico State University
- ▶ Harvard Online Tutoring
- ▶ Houston Community College System
- ▶ John Tyler Community College
- ▶ Kennesaw State University
- ▶ Palm Beach Community College
- ▶ Reformed Theological Seminary
- ▶ SureScore
- ▶ Tyler Junior College
- ▶ University of Memphis
- ▶ University of Massachusetts - Dartmouth
- ▶ University of Tampa

Key Features of the AskOnline e-Tutoring System:

Custom website

- ▶ Custom website created specifically for your institution with your unique branding

Security

- ▶ Secure, password protected site for tutors, students and administrators to access over any Internet connection

Easy-to-use

- ▶ Features an intuitive web interface with a clean design that can even accommodate dial-up connections

Multiple Subject Areas

- ▶ Allows you to offer tutoring in multiple subject areas, with built-in communications tools for each specific subject area

Scheduling System

- ▶ Comprehensive scheduling system to create and post tutor schedules and availability

Real-Time Communications

- ▶ Synchronous tools that enable real-time communication between tutors and students, as well as asynchronous tools for communication when students and tutors are not online at the same time

Search

- ▶ Search capability makes it easy for students and tutors to access previous tutoring sessions

Tracking

- ▶ Robust tracking and reporting to provide you with instant access to critical data including time students and tutors spend online as well as recorded transcripts of communications between students and tutors

Cross Platform

- ▶ Compatible with both PC and Mac computers

Additional options include:

- ▶ LDAP integration
- ▶ Audio/Video conferencing capabilities
